# Table of Heuristic Violations: KS

| Description | System Location | Heuristics Violated | Severity |
|---|---|---|---|
| When the cancel button is pressed in the prompt, the prompt changes to a more detailed description. However the prompt doesn't give a clear message to the user whether or not they're sure about canceling.<br>  | Creating a new thread - Create a link | #9: Error Recovery<br>#5: Error Prevention<br>#2: Match Between System and Real World<br>#3: - User Control and Freedom | 3: major usability problem; important to fix |
| Doesn't have an option for saving as a draft nor a warning notification before pressing the Cancel button and clicking out of the model for creating a new post.<br>  | Creating a new thread | #5: Error Prevention | 3: major usability problem; important to fix |
| This is located in the Discussion Forum's main/home page. Week 3 is featured as the forum to go to in the header, but it is unclear | Discussion Forums | #2: Match Between System | 2: minor usability problem; |
